Panel Build

From the complex to conventional Iconsys delivers outstanding results

Iconsys offer advanced panel build for OEM clients, contractors and end users requiring either large or small production runs. Our factory in Telford, Shropshire houses state of the art engineering, manufacturing, and testing capabilities and affords us the opportunity to supply our customers with cost effective solutions while maintaining very competitive lead times. Iconsys strives to exceed our customer's expectations while providing the highest quality products and services to our clients in the most cost efficient means.

All of our projects are undertaken in-house by our experienced and knowledgeable engineering manufacturing team. At the outset you will be assigned a dedicated Project Manager offering you a single point of contact, so you are always able to find out the status of production. We review drawings prior to production begins and work alongside you to solve any issues that materialise.

Types of panels delivered to our customers:

- Panels designed and build to your specification
- RTU panels
- Relay protection panels
- Telecoms panels
- Mutli-function
- Transformer rectifier panels
- Distribution board (DB) panels
- MCC panels
- Terminal boxes
- Testing panels
- Remote HMI panels
- Drive suite panels
- DC BUS panels
- Containerised panels

iconsys

Our objective at Iconsys is to provide a first-class product with exceptional customer service and support. We work closely with the major manufacturers in the electrical industry, and only use quality components in our panels. Every panel is provided with complete drawings and schematic and is tested prior to leaving our plant.

Service & Support

We have a dedicated team of professional engineers and technical experts solely focused on first line support of panels and machinery.

Quality

Panels are assembled and wired with attention to detail. We ensure quality workmanship with a comprehensive testing program. Panels are checked for compliance with your drawings before shipment. If you desire, a FAT can be scheduled in order to give your designers time to check out the panel and get it ready for commissioning. All of this is scheduled so we can ship a quality panel on time.

Iconsys ensures high quality products via detailed and thorough factory testing performed by experienced quality and electrical manufacturing technicians. Extensive manufacturing experience allows Iconsys to provide cost-effective solutions for many customer electrical needs. Iconsys is certified to ISO9001:2015 working to a well-structured and exacting quality standard.

Who we are

Iconsys is a leading UK automation solutions provider and systems integrator. Well-established and highly respected, we combine innovative technologies with extensive industry knowledge and experience, supporting you throughout the asset lifecycle to enhance the performance of your business.

Our vision is to lead customers into the digital era, through close working partnerships built on trust. We are driven to delivering world-class solutions that inspire change across multiple markets.

Whatever industry you're in, whatever technology you need, Iconsys has the solution.
